DETAILED ACTION

1. The request filed on September 14, 2000 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/135,183 is acceptable and a CPA has been established. Applicants are informed that the substitute specification will be entered, however, the pending claims will not be substituted. An action on the CPA follows.

Claim Rejections - 35 USC §§ 101 and 112

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 is rejected under 35 U.S.C. § 101 because the claimed invention lacks patentable utility due to its not being supported by a specific, substantial, and credible utility, or a well established utility.

The compositions, as claimed, do not have any readily apparent utility as established either by the specification or any art of record. Although an electrode comprising a self-assembled monolayer comprising conductive oligomers and a capture probe can be used in methods for the detection of a target sequence and would meet the utility requirements, such a composition further comprising a target nucleic acid would not have utility. A composition for detecting a component of itself is not useful.

Applicants can overcome this rejection by amending the claims such that claims are drawn only to limitations of the composition of the electrode prior to methods of use (not to limitations of the), and any other requirements as set forth in 35 U.S.C. § 101.

Claim 1 is also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Conclusion

4. Claims 2-22 are allowable.

5. Any inquiries concerning the *merits* of this communication or earlier communications from the Examiner should be directed to Jeffrey S. Lundgren, whose telephone number is (703) 306-3221. The Examiner can normally be reached on Monday-Friday from 7:00 AM to 5:00 PM (EST).
